EDUCATION

2026 - present Ph.D. (Astrophysical Sciences and Technology) at **Rochester Institute of Technology**
2024 - 2026 M.S. (Astrophysical Sciences and Technology) at **Rochester Institute of Technology**
2021 - 2024 B.S. (Physics & Astronomy, Computer Science Minor) at **University of Pittsburgh**
(Cum Laude, Departmental Honors)

RESEARCH

My research interests lie in studying how galaxies form stars through cosmic time. I combine SPS modeling codes with photometric and spectroscopic observations to derive the star-formation histories of galaxies.

POPPIES

The Public Observation Pure Parallel Infrared Emission-Line Survey, is a JWST Cycle 3 large area NIRC2 wide-field slitless spectroscopy (WFSS) program (POPPIES) designed to study the distance Universe. As the lead data reduction scientist for this survey, I am reducing ~ 150 different fields (each with 3-8 filters), creating mosaics, and producing photometric catalogs. I also use these data to investigate the stochastic nature of star formation in the early universe designed to probe galaxies out to $z > 5$.

PASSAGE

The Parallel Application of Slitless Spectroscopy to Analyze Galaxy Evolution (PASSAGE) survey is a JWST Cycle 1 pure parallel NIRISS WFSS program. As a part of my fellowship at Caltech/IPAC, I utilize this rich data set to probe star formation in galaxies at out to $z \sim 5$.

SQUIGGLE

the Studying QUenching in Intermediate-redshift Galaxies: Gas, angular Momentum, and Evolution (SQUIGGLE) survey is a multi-wavelength study of post-starburst galaxies (PSBs) at $z \sim 0.7$. My work focuses on studying the environments of these PSBs, specifically targeting the gas-rich "buddy galaxies" that live within the dark matter halos of the massive PSBs.

TEACHING AND OUTREACH

Graduate Teaching Assistant, RIT

Aug 2024 - Present

- Stellar Astrophysics TA Fall 2026
- Solar System Astronomy Grader Fall 2026
- Observational Astronomy TA Spring 2026
- Galactic Astrophysics TA Fall 2025
- College Physics 1 TA Spring 2025
- College Physics 1 TA Fall 2024

ImagineRIT Coordinator, RIT

Jan 2025-Present

- ImagineRIT is an annual and university wide public outreach event targeting all ages. As coordinator, I plan and organize RIT's Astrophysics exhibit.

Research Group Leader for STEPUP, University of Pittsburgh

Sep 2021-July 2024

- STEPUP (Survey of Transiting Extrasolar Planets at the University of Pittsburgh) is an undergraduate led research group at the University of Pittsburgh.
- Recruit and mentor students to join undergraduate research.
- Teach students how to use telescopes at Allegheny Observatory, collect data, process images, create light curves, make sense of their findings, and explore other areas of exoplanet research.

Allegheny Observatory Outreach

Aug 2023-April 2024

- Astrophysicist for a Day: Panelist and guest lecturer for high school students interested in pursuing a career in astrophysics. developed inquiry-based activities using real astronomical datasets, enabling students to carry out analyses similar to professional astrophysical research and produce meaningful results.
- Allegheny Observatory Open House: Ran exhibit for STEPUP

STUDENTS SUPERVISED

Andres Becerra (Vanderbilt University Undergraduate student in RIT Multimessenger Astrophysics REU program, Summer 2026) “Investigating Galaxy Populations Out to Cosmic Noon with pure parallel JWST NIRCам WFSS observations”

PRESENTATIONS

1. *Investigating Bursty Star Formation Across Cosmic Time with JWST Parallel Fields*, JWST Weekly Briefing Meeting, Summer 2026, Space Telescope Science Institute, Baltimore, MD

2. *Constraining the Star Forming Main Sequence Relation with JWST Parallel Fields* Anika Kumar, Jeyhan Kartaltepe, Marc Rafelski, POPPIES Collaboration, Talk, WFSS Workshop, Summer 2026, Space Telescope Science Institute, Baltimore, MD
3. *POPPIES in Bloom: Constraining the Star Forming Main Sequence Relation with JWST Parallel Fields* Anika Kumar, Jeyhan Kartaltepe, Marc Rafelski, POPPIES Collaboration, Talk, COSMOS 2026 Meeting, Summer 2026, UCSB, Santa Barbara, CA
4. *Meet the Neighbors: Gas Rich “Buddy Galaxies” are Common around Recently Quenched Massive Galaxies in the SQuIGGLE Survey* Anika Kumar, David Setton, Rachel Bezanson, Talk, End of Star Formation meeting, Spring 2026, University of Illinois Urbana-Champaign, Urbana, IL.
5. *The Despicable SFR: A Minion’s Take on the Star Forming Main Sequence with POPPIES* Anika Kumar, Jeyhan Kartaltepe, Marc Rafelski, POPPIES Collaboration, Talk, AST Halloween Jamboree, awarded best talk, Fall 2025, RIT, Rochester, NY
6. *Characterizing the Star-Forming Main Sequence of Low-Mass, High-Redshift Galaxies in the POPPIES Survey* Anika Kumar, Jeyhan Kartaltepe, Marc Rafelski, POPPIES Collaboration, Talk, Infrared Spectroscopy from Space Symposium, Fall 2025, Caltech, Pasadena, CA
7. *Gas Rich “Buddy Galaxies” Found Near Recently Quenched Galaxies at $z \sim 0.6$* Anika Kumar, Rachel Bezanson, David Setton, Poster, CUWiP, Spring 2024, Undergraduate Poster Session Fall 2023, University of Pittsburgh, Pittsburgh, PA.
8. *Gas Rich “Buddy Galaxies” Found Near Recently Quenched Galaxies at $z \sim 0.6$* Anika Kumar, Rachel Bezanson, David Setton, Poster, CUWiP, Spring 2024, West Point Academy, West Point, NY.
9. *Gas Rich Neighbors are Common Around Recently Quenched Galaxies in the SQuIGGLE survey* Anika Kumar, Rachel Bezanson, David Setton, iPoster, 243th AAS meeting, New Orleans, LA
10. *Gas Rich “Buddy Galaxies” Found Near Recently Quenched Galaxies at $z \sim 0.6$* Anika Kumar, Rachel Bezanson, David Setton, Poster, Undergraduate Poster Session Fall 2023, University of Pittsburgh, Pittsburgh, PA.
11. *Gas Abundances in Post-Starburst Galaxies* Anika Kumar, Rachel Bezanson, David Setton, Justin Spilker, Poster, Undergraduate Poster Session Spring 2023, University of Pittsburgh, Pittsburgh, PA.
12. *Incidence Rate of Neighboring Gas-Rich Galaxies* Anika Kumar, Rachel Bezanson, David Setton, Justin Spilker, Poster, CUWiP, Spring 2023, Penn State University, State College PA.
13. *Gas Abundances in Post-Starburst Galaxies* Anika Kumar, Rachel Bezanson, David Setton, Justin Spilker, Poster, Duquesne Summer Research Symposium, Summer 2022, Duquesne University, Pittsburgh PA.

OBSERVING PROGRAMS

James Webb Space Telescope

Cycle 5 AR #11320; PIs: A. Kumar, J. Kartaltepe (\$140k)

SCHOLARSHIPS AND FELLOWSHIPS

IPAC Visiting Graduate Student Research Fellowship

Feb-Aug 2027, Pasadena, CA (\$29k)

RIT COS Alumni Endowed Academic Scholarship

2026-2027 academic year (\$2.5k)

NAASC and RAS Travel Support

- March 2026, Travel support for the End of Star Formation meeting (\$700)

AST New York Space Grant

- Spring 2026 (\$5*k*)

NASA Pennsylvania Space Grant Consortium

Fall 2023, Spring 2023, Fall 2022, Summer 2022, Spring 2022 (\$12*k*)

PROGRAMMING EXPERIENCE

Languages

- Python, Java, MIPS Assembly, Matlab

Image Processing/Reduction

- AstroimageJ, AsTAP, MIRA, JWST Science Calibration Pipeline, JHAT, Photutils, SExtractor

SPS modeling

- Bagpipes, Prospector, LePHARE
